The Business Challenge

Documents in governmental accounting, particularly in school districts, are extremely scrutinized and/or dissected by many levels of reporting agencies, auditors, and the public. This makes an auditable document trail crucial, down to the very tiniest receipt.

- + Documents are hard to find
- + Retrieving documents through warehouse system
- + Lost documents many we not recoverable
- + Rapidly growing workload with no budget for new help
- + Quality assurance was limited
- + High copier costs
- + Internal controls on confidential material were limited

WHAT THEY'RE SAYING NOW

“*The adoption of electronic invoicing and automated invoice workflow completely changed all our previous processes*”

Cathy Mitchem, Broken Arrow Public Schools Director of Finance

The Process

ImageNet Consulting provided a comprehensive ECM program with Laserfiche RIO Electronic Content Management software suite.

The Results

- + Eliminated late payment fees
- + Increased early payment discount capture
- + Reduction of storage and retrieval costs
- + Reduced exposure to compliance issues
- + Improved financial reporting
- + Faster Accounts Payable process cycles
- + Increased visibility and collaboration within the AP process

“Additional benefits include increased control and visibility into spend, on time payments, increased capture of discounts and added efficiency in the AP department to focus on more strategic issues that help drive business.”

Cathy Mitchem, Broken Arrow Public Schools Director of Finance

About ImageNet Consulting

To accomplish our mission, we train our consultants to optimize and enhance the management of business processes.

In most cases, this has changed little since the 1600's. While technology changes at an ever increasing pace, business processes driven by the movement of paper have not. Many studies reveal the inefficiencies of paper-based processes. While most business professionals agree with these findings, they do not possess the time or expertise to evaluate and improve the situation. This is where ImageNet Consulting defines its value proposition; uncovering problems, consulting and evaluating options, then delivering on solutions that enhance productivity while reducing costs and positively impacting the business' bottom line. ImageNet Consulting provides a vast array of solutions and experience to manage business processes. The most compelling argument to allow our company to help improve these processes is our independence from manufacturer ownership. This independence allows our company to deliver best-in-class solutions with flexibility not offered by a single line dealer or manufacturer. Through our manufacturer-agnostic and solution-led approach, we are able to offer best-in-class technologies to meet our customer's needs. This requires a clear vision of the future and a nimble company that constantly reinvents itself while keeping ahead of the latest technology developments.

Our customers range from small businesses to some of the largest corporations in the world. We are confident no other company can match our portfolio of products, solutions, and the expertise with which we deliver them.
