RANDALL
UNIVERSITY

The Business Challenge

Hillsdale Freewill Baptist Church was struggling with the workflow and document management of an almost entirely paper-based processing system. Most processes were paper-based, including:

- Admissions
- Financial Aid
- Bursar
- Enrollment

Hillsdale employees spent large amounts of time each day searching and filing department files, which eventually developed into departmental communication issues and difficulties with information sharing. Their hardware fleet was also aging & becoming costly to operate.

WHAT THEY'RE SAYING NOW:

“ *ImageNet Consulting was interested in our success and profitability, as well as theirs. They were genuine with a desire to ensure that the relationship was a win-win.* **”**

- Dr. Mark Braisher, VP, Hillsdale Freewill Baptist University

The Process

ImageNet Consulting provided a comprehensive MPS program, Universal Send scanning software, Laserfiche Avante Electronic Content Management software suite, LincDoc Enterprise Edition electronic forms suite, PaperCut MF print audit software suite, and HP & Canon multifunction devices for industry-specific scanning, printing, and archiving needs.

The Results

- + Documents were filed into an organized electronic folder structure that afforded Hillsdale employees easy search capabilities.
- + Dynamic forms enabled users to remotely request information or submit payments
- + The print environment was consolidated & updated.
- + A toner recycling program was implemented
- + A student tracking and billing system streamlined the workflow for AP & AR

In addition to not having to hire additional staff to work in AP and AR, Hillsdale now enjoys a \$700 per month savings in operating costs through MPS, a 40% reduction in their hardware fleet, and has generated revenues in excess of \$75 per month through MPS and PaperCut.

WHAT THEY'RE SAYING NOW:

“*It became obvious that we were not being sold services, we had a partnership.*”

- Dr. Mark Braisher, VP, Hillsdale Freewill Baptist University

About ImageNet Consulting

To accomplish our mission, we train our consultants to optimize and enhance the management of business processes.

In most cases, this has changed little since the 1600's. While technology changes at an ever increasing pace, business processes driven by the movement of paper have not. Many studies reveal the inefficiencies of paper-based processes. While most business professionals agree with these findings, they do not possess the time or expertise to evaluate and improve the situation. This is where ImageNet Consulting defines its value proposition; uncovering problems, consulting and evaluating options, then delivering on solutions that enhance productivity while reducing costs and positively impacting the business' bottom line. ImageNet Consulting provides a vast array of solutions and experience to manage business processes. The most compelling argument to allow our company to help improve these processes is our independence from manufacturer ownership. This independence allows our company to deliver best-in-class solutions with flexibility not offered by a single line dealer or manufacturer. Through our manufacturer-agnostic and solution-led approach, we are able to offer best-in-class technologies to meet our customer's needs. This requires a clear vision of the future and a nimble company that constantly reinvents itself while keeping ahead of the latest technology developments.

Our customers range from small businesses to some of the largest corporations in the world. We are confident no other company can match our portfolio of products, solutions, and the expertise with which we deliver them.
